3.3 Applications management.....	19

There will be 3 parts to manage, including 2 essential for the production launch and a "bonus" that can be considered if there is time. These 3 parts will be named as such: Aesthetic corrections, functional corrections and optimisations.

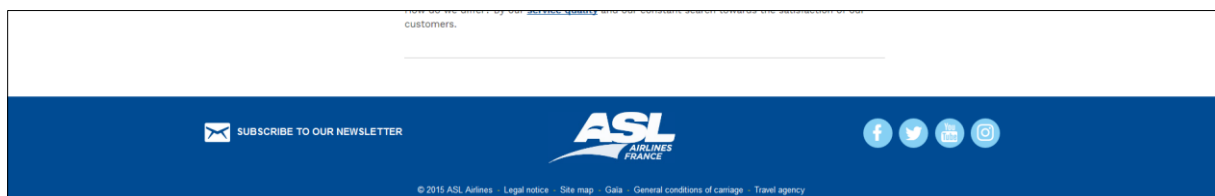

I. Aesthetic corrections:

1.1 Footer

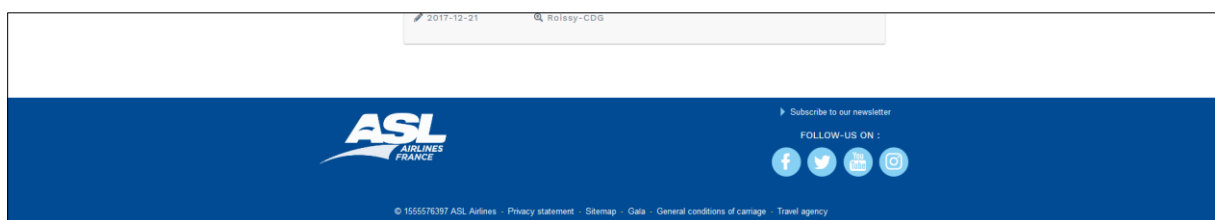

The footer of the join us website is not identical to the one of the aslairlines.com website.

➔ Copy the footer from the aslairlines.com website on Rejoignez-nous.

This is how it looks on aslairlines.com.

This is how it looks on the current version of Rejoignez-nous

1.2 Elements at the top right

The position of the elements at the top right on Rejoignez-nous is not identical to the aslairlines.com website.

➔ Correct the position of the elements

This is how it looks on aslairlines.com.

This is how it looks on the current version of Rejoignez-nous

(It is not obvious like that but when you go from one page to another, you can see the difference.)

1.2 Buttons

Buttons like the "apply", "login" or even "save" buttons in the Contact section turn too light when you move the cursor over them. They become almost unreadable.

➔ Assign the following color to the buttons when passing over them with the cursor : #86d0f4

1.3 Menu columns

On the different menus of the website, there are very often "lists" with several columns. We would like users to be able to manage the width of the columns, as is the case with the windows explorer for example.

➔ Create the feature that allow the user to change the wisth of the columns

Nom	^	Date	Type	Taille	Mots clés
-----	---	------	------	--------	-----------

1 Menu column of the windows explorer

1.4 Offers headline

➔ Remove the field "Info" from offers

Responsable Suivi Technique Lancement

Info

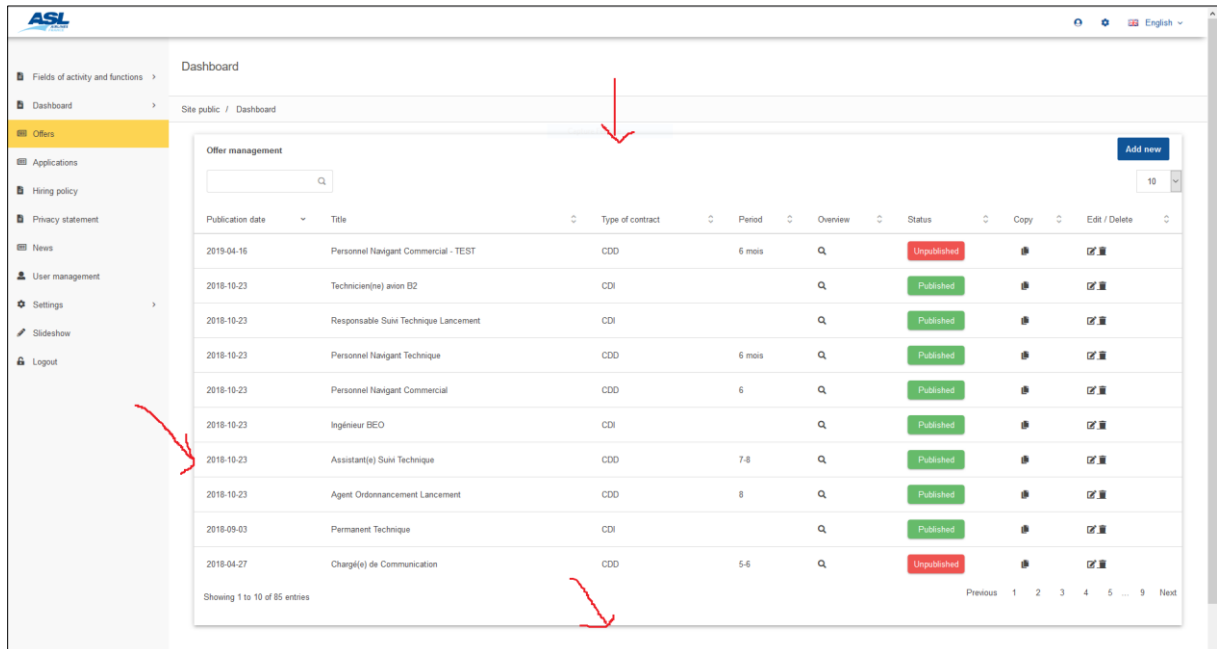

Location : Roissy-CDG

Publication date of the offer: 2018-10-23

1.5 Panel in the pages

We don't need this panel after all. The content of the pages should be displayed directly on the pages and not in a sub-window

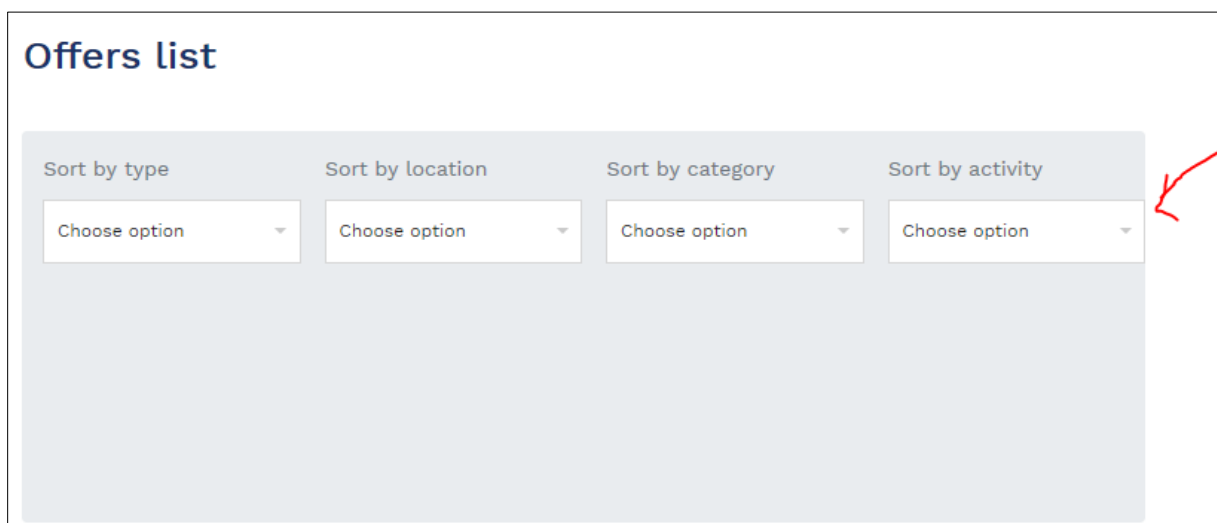

➔ I'm talking about this "panel" (the borders). Just remove it.

1.6 Filters

The filters are not centered. Usually the one on the right touches the edge.

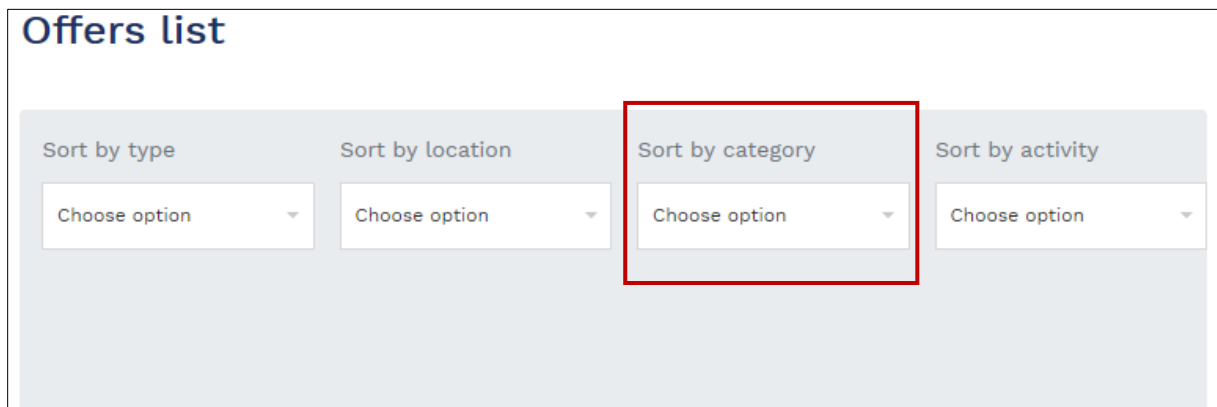

Example on the offers list :

➔ Ensure that the filters are centered on the entire website.

1.7 Category filter on the offers list

➔ Remove the filter “Category” from the offers list

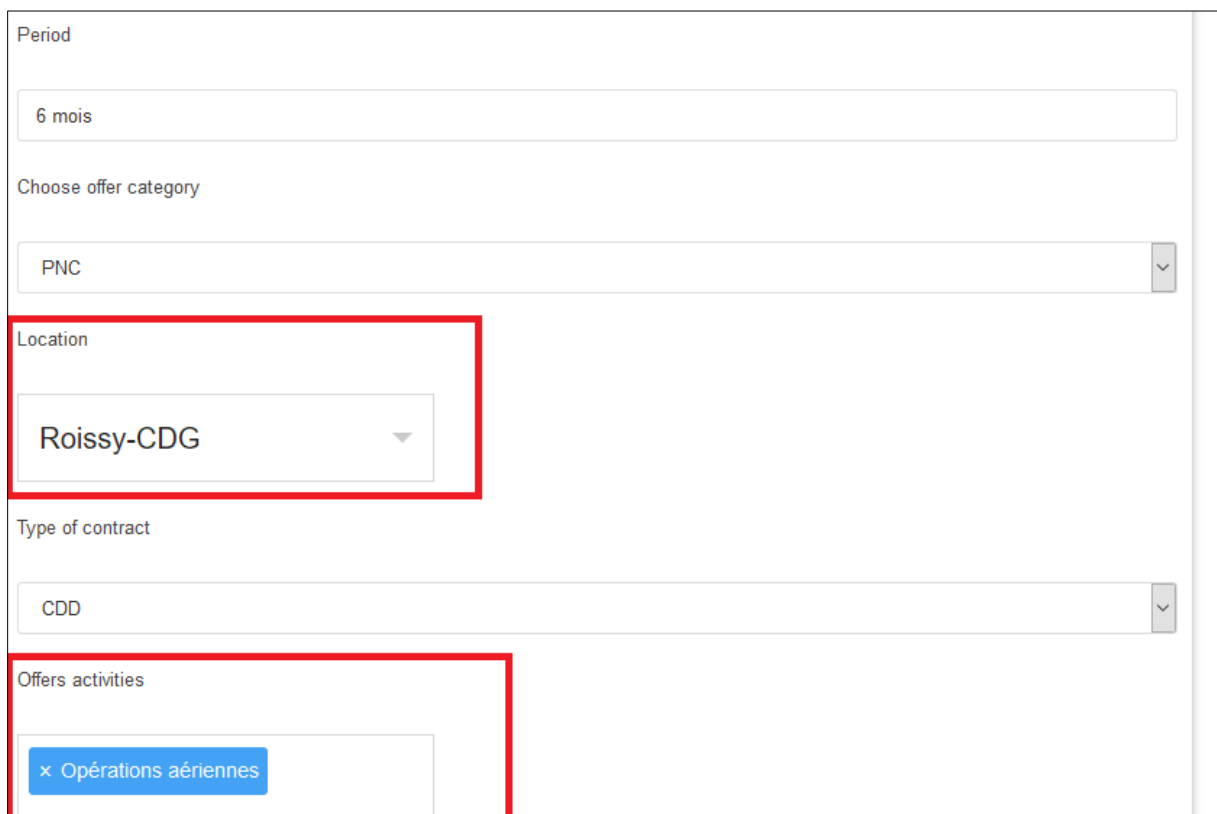

The screenshot shows the 'Offers list' interface. At the top, there are four sorting options: 'Sort by type', 'Sort by location', 'Sort by category', and 'Sort by activity'. Each option has a corresponding dropdown menu labeled 'Choose option'. The 'Sort by category' dropdown is highlighted with a red rectangular box.

1.8 Fields size

In the offer editor, the fields "location" and "offers activities" are disproportionately large.

➔ Put the "location" and "offers activities" fields in the same size as the others (period, publication date, type of contract, etc.)

The screenshot shows the offer editor form. It contains several fields: 'Period' (with a value of '6 mois'), 'Choose offer category' (with a value of 'PNC'), 'Location' (with a value of 'Roissy-CDG'), 'Type of contract' (with a value of 'CDD'), and 'Offers activities' (with a value of 'Opérations aériennes'). The 'Location' and 'Offers activities' fields are highlighted with red rectangular boxes, indicating they are disproportionately large compared to the other fields.

1.9 Offers activities field

➔ Rename the field “Offers activities” into “Field of activity”

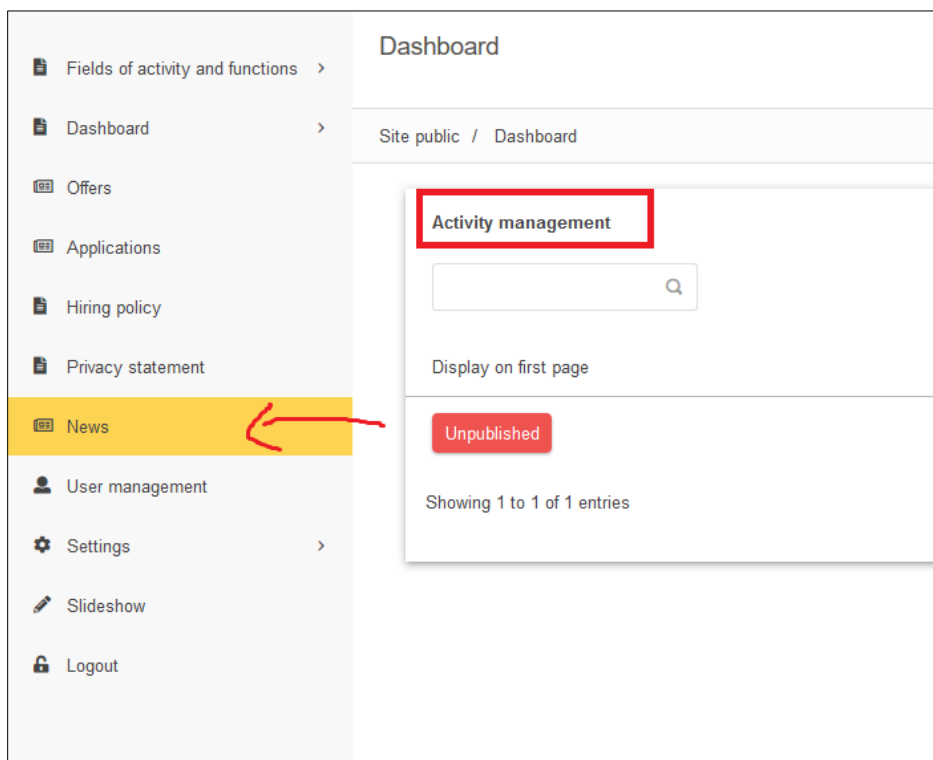

1.10 Title of sections

On some sections, the title does not match. They must therefore be renamed. The sections concerned are as follows:

- News
- Privacy statement
- Applications
- Unsolicited applications
- Manually created applications
- Activity
- Function

➔ Rename these sections with the correct title

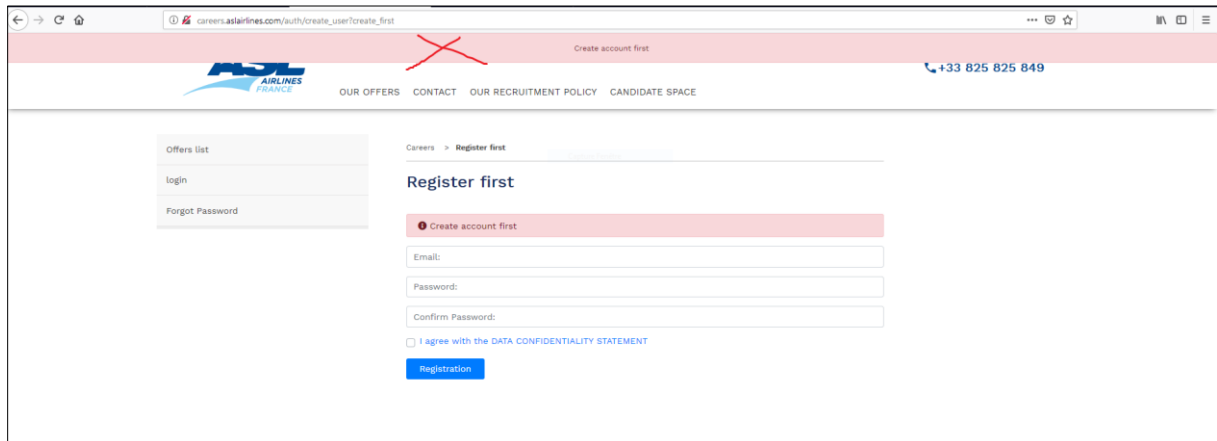

Example with the section “News”:

1.11 Banners account creation

When a user wish to apply to an offer, he must create an account first. But one single banner is enough to give him the message.

➔ Delete the banner at the top of the page

1.12 Sections name

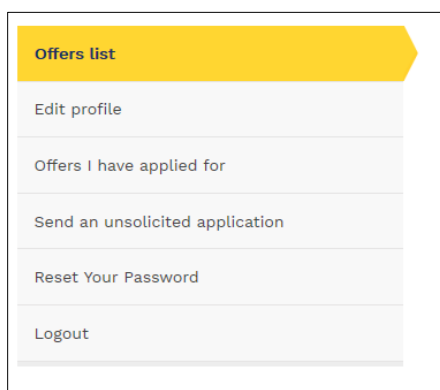

➔ Rename the following sections as follows:

- Our offer ➔ Job Search & Apply
- Our recruitment policy ➔ Equal opportunity
- Candidate space ➔ Login

1.13 The menu

The 6-section menu (currently present only after login) should always appear, only the next 3 subsections are accessible only after login. The user will therefore go through the login page during the process.

➔ Make the 6-section menu persistent

1.14 “Reset your password” section

➔ Rename the fields as follows :

- Old password (“Ancien mot de passe” in French)
- New password (Nouveau mot de passe)
- Confirm new password (Confirmer le nouveau mot de passe)

1.15 Foreign languages & Experience

In the unsolicited application process:

➔ align fields and drop-down menus

Personnel Navigant Technique

Please fill form listed below

Click on save to keep the progress

Foreign languages

English level Bilingue

French level Maternelle

Russe Courant + -

Delete Save ➔

1.16 Upload document

In the application process:

When the user upload a document, this square appears. This is incomprehensible to the user, so it should be deleted. The name of the file should be enough.

Personnel Navigant Technique

Click on save to keep the progress

CV

Drop the files here

Click to open the file explorer

Delete

Save →

1.17 “Offers I have applied for” section

In this section, the footer is in the middle of the page. The footer should always be at the bottom of pages, regardless of the content of the pages.

➔ Put the footer at the bottom

1.18 Update French language

- ➔ Correct "Inactif. Cliquer pour activier" into « Inactif. Cliquer pour activer »
- ➔ Add translations for « Dashboard », « showing 1 to... », « previous », « next », etc.

1.19 Offers list filters

The drop-down menus in the offer list are not displayed correctly. They are "eaten" by the bottom edge. This problem must be solved.

- ➔ make the filters readable.

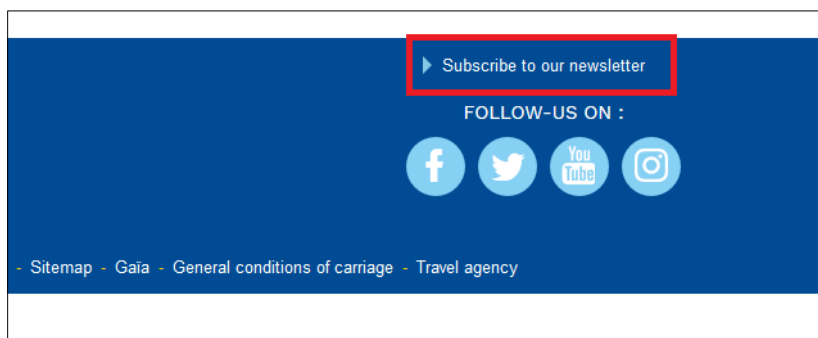

II. Features corrections

2.1 Newsletter

In the aesthetic part, we talked about the footer, that they had to be identical. This is also the case for links to which they refer. The link to the newsletters is not up to date.

- ➔ update the newsletter link

2.2 Legal notice

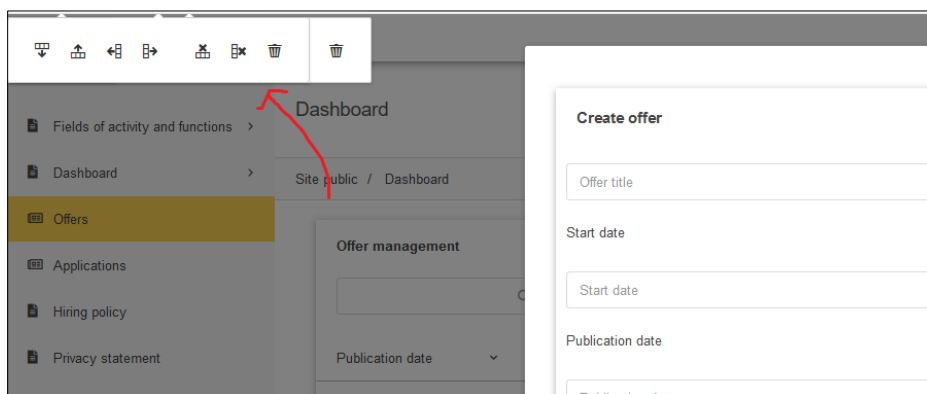

➔ add the "legal notice" link in the footer, as is the case on the aslairlines.fr website

2.3 Offer editor

In the offer editor, a menu appears at the top left. This menu is not useful to users, so it should be deleted.

➔ Delete the menu at the top left

2.4 Leaving Offer editor

➔ enlarge the cross area a little to leave the editor (allow the following area)

2.5 Offers filters

Display the contents of the drop-down menus as follows:

➔ Contract type

SELECT type FROM application_contract ORDER BY type

➔ Location

SELECT location FROM offers_location ORDER BY location

➔ Business area

SELECT activity FROM activities ORDER BY activity

2.6 Foreign languages

During the application process for an offer, when you want to add foreign languages, you have to click twice on the field for the list to appear.

➔ Make one click sufficient.

Foreign languages

English level Bilingue

French level Maternelle

Russe Courant + -

Language Courant + -

2.7 Uploading documents

After posting a document online, you cannot delete it, you can only replace it.

➔ make it possible to delete a document posted online

2.8 Phone number

In the application process (in response to an offer or unsolicited application), the field associated with the candidate's telephone number only accepts numbers. It should be possible to enter spaces and the + sign.

➔ Allow spaces and the + sign for the phone number

Example:

Technicien(ne) avion B2

Click on save to keep the progress

Profile

Denmark

Tremblay-en-France

93290

15 rue du haut de Laval

+33 1 48 97 57

Second telephone number

Delete

Save ➔

2.9 Dashboard \ Applications in response to an offer

➔ Replace the “activity” column by the offer associated with the application.

➔ Correct the content of the column “type of contract”

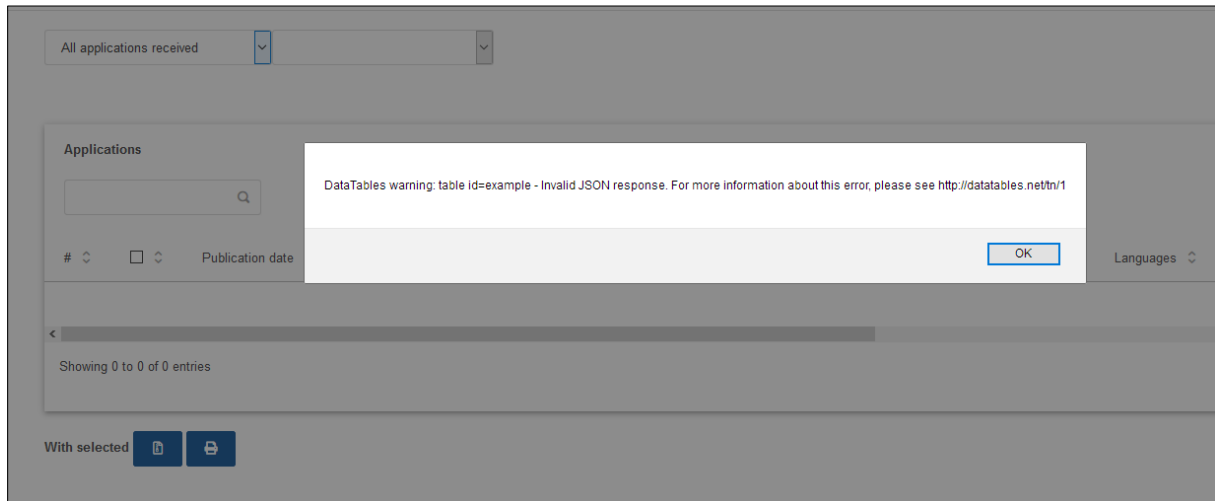

Applications in response to an offer						
Offers						
Publication date	Status	Activity	Type of contract	Period	Total	
23/10/2018	Published	Technique	HR		1	
23/10/2018	Published	Opérations aériennes	HR	6	1	
23/10/2018	Published	Opérations aériennes	HR		2	
21/12/2017	Published	Technique	HR	9	1	

Showing 1 to 4 of 4 entries

2.10 Applications management

Does not display the list, either via the dashboard Applications in response to an offer or via filters. We have an error message.

➔ Find a solution to this problem

2.11 Dashboard \ Unsolicited applications

2.11.1

The content of the following columns are not good

Publication date	Function	Activity	Type of contract
Send an unsolicited application	Send an unsolicited application	Send an unsolicited application	Send an unsolicited application

Showing 1 to 1 of 1 entries

➔ display the relevant information in the columns "publication date", "function", "activity", "type of contract".

2.11.2

After displaying the list, if you want to manage the applications, the list is not displayed. By the way the footer is not good neither.

						<div>Add new</div>
						<div>10</div> <div></div>
Meeting	Test	Decision	Status	Download the folder	Print	<div></div> <div></div> <div></div> <div></div> <div></div> <div></div>

➔ resolve the problem related to the management of applications

2.12 Documents uploaded by applicants

➔ formalize the documents uploaded by the candidates

- CV → CV_*last name_first name_current year*
- Cover Letter → Cover Letter_*last name_first name_current year*

2.13 Applications management \ Manually created applications

2.13.1

- ➔ in the drop-down menu of the offer search, add the date of publication of the offer and a coloured dot to indicate whether or not it is published

2.13.2

- ➔ in the fields "folder", "meeting", "test" and "decision", replace "file not consulted" by "not done yet"

2.13.3

Creating an application works but opens a blank tab and error message if the page is updated.

- ➔ Resolve this problem

2.13.4

- ➔ add the steps of a normal application, i.e. education, experience, etc.

2.14 Backoffice access

- ➔ Access backoffice from *base_url/admin*

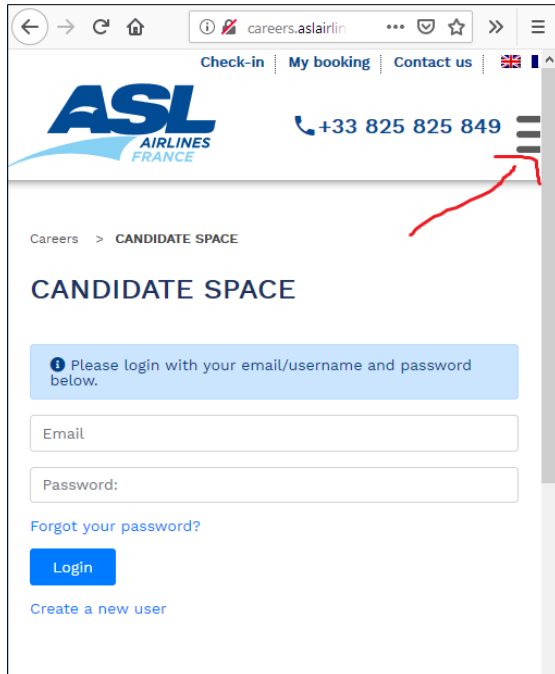

III. Optimisations

3.1 City selection

It would be nice if the user could select his city (section "profile" and process application) by simply entering his postal code. The cities associated with this postal code would then be suggested and the user would only have to select his city from the list.

3.2 Window reduction

When we reduce the window in width, a menu icon appears in the top right corner to give us access to the different sections (offers, contact, recruitment policy, candidate space) except that nothing happens when we click on it and it is badly placed (cut in half)

3.3 Applications management

Considering that the fields follow each other logically (folder-->meeting-->test--->decision), if the user directly indicates a field without going through the previous steps, they must take the value of the last value (the highest in the steps). Must only work if the previous step(s) are blank, because obviously if the previous steps are already selected/colored do not change their color.
